

Cleaning Tool Care and Replacement

Stick this inside a kitchen or laundry cupboard and write down the date you replace each item.

◆ Kitchen

Dishcloths — wash after use and dry spread out · boil or soak in oxygen bleach 1–2 times a week · replace if the smell will not go

Sponges — rinse and stand up to dry · soak in oxygen bleach weekly · replace every 2–4 weeks

Rubber gloves — turn inside out to dry · replace when torn or sticky

◆ Floors and home

Microfiber cloths — wash separately, without fabric softener · replace when stiff

Mop pads — wash after use and dry completely

Vacuum — empty the bin every time · cut hair off the brush · clean filters as the manual says

Dusters — shake outside; wash occasionally with mild detergent

◆ Bathroom

Toilet brush — shake off water and let it dry · replace every 3–6 months

Bath brushes and sponges — rinse and hang to dry

Squeegee — replace when the blade bends or leaves streaks
